After reviewing more than 4,000 proposals during the last
Code cycle, acting on them, and reviewing public comments
made on the accepted changes, the NFPA Code Making
Panels and Technical Committee have wrapped up work on
the latest edition of the National Electrical Code (NEC). The
2017 NEC was published last month by the NFPA and is now
available.

2017 National Electrical Code Changes - Home | EC&M
Nine new articles were proposed, and five new articles
emerged in the 2017 NEC. Many of the changes and new
rules in this edition specifically address new technologies,
such as expanded use of energy-storage systems and
equipment; microgrid installations; and large-scale,
photovoltaic (PV) system installations, but in total, the
changes are as diverse as the Code itself.

The changing landscape has caused electrical experts to re-imagine the future of the electrical grid, and has been one of the main drivers for three of the most important proposed additions to the 2017 National Electrical Code® (NEC®). More and larger consumer-owned power generation has caused the NEC's code-making panels to consider systems and circumstances they never had previously.

2017 Nec Code Changes Home Otter Tail Power Company

The 2017 National Electrical Code (NEC) includes several sections with new short-circuit protection requirements. The most significant changes require that the available short-circuit current at the location where the equipment is installed is marked/ documented and dated. These changes allow installers, inspectors and approvers to verify that the installed equipment short-circuit current rating (SCCR) is equal to or greater than the available short-circuit current, and compliant with the ...
