Short and Simple Description and de deeply explained the Fundamental concepts.

Engineering Graphics, in its 13th year, has been succinctly revised for the Engineering students of 1st year of Gujarat Technological University, Ahmedabad Beginning with the units, dimensions and standard, this book discusses the measurement and measurement errors. Then, it goes on to discuss electronics equipment, measurements of low resistance and A.C. bridges. Moreover, the book deals with the cathode ray oscilloscopes. Further, it describes various instrument calibration. Finally, the book deals with recorders and plotters.

This book is the work of almost 3.5 years of my academic career. The book focuses on the way of starting a new export and import business. The entire book is divided into four main modules. The 1st module discusses about the role of export import in developing country like India, the current scenario of the Export and import in India, Categories of Exporters and Preliminaries of starting an Export and Import Business in India. The 2nd module discusses about the registration process of Exporters and importers, registration with Export Promotion council, Registration cum membership certificate, registration with government bodies relating to the Export and import business. The 3rd module discusses about the detailed registration process of central excise, assessment of the central Excise, mode of payment of central excise, CENVAT credit, arranging for the import finance and export finance and the EXIM bank. The 4th Module discusses about the Scrutiny of the Import and export documents, Methods of payment, Exchange rate, forward market, Custom Clearance of imported goods, Agri Export zone, 100% Export oriented units, Export Processing zones, Special Economic zones, Port trusts, Service exports, Service Export Councils and FEMA Act Each unit comprises of a list of terms and practice questions. It also has past GTU Papers for the practice of the students. The book is worth for the bachelor level and even few master level students who learn Export and import Procedures and International Business.

This is a completely revised book in line with ' Outcome Based Education (OBE) ' that is currently being followed by most universities. Also, the engineering drawings in the book have been prepared using the latest version of AutoCAD.

The book strictly complies with the new syllabus of Gujrat Technological University, Ahmedabad, for B.E. First year of all braches of Engineering. The subject matter is presented in a graded stepwise, easy to follow style. Each chapter includes Multiple Choice Questions, Review Questions and Exercises for easy recapitulation.

Strictly according to the New Syllabus of Gujarat Technology University, Ahmedabad (Common to All Branches of B.E. / B.Tech 1st year)

Data and File Structure has been specifically designed to meet the requirements of the engineering students of GTU. This is a core subject in the curriculum of all Computer Science programs. The aim of this book is to help the students develop programming and algorithm analysis skills simultaneously such that they are able to design programs with maximum efficiency. C language has been used in the book to permit the execution of basic data structures in a variety of ways. Key Features 1. Simple and easy-to-follow text 2. Wide coverage of topics 3. Programming examples for clarity 4. Summary and exercises at the end of each chapter to test your knowledge 5. Answers to selected exercises 6. University question papers with answers 7. Objective type questions for practice

The book has been developed to provide comprehensive and consistent coverage of both the concepts of data structures as well as implementation of these concepts using C programming. The book utilizes a systematic approach wherein each data structure is explained using examples followed by its implementation using a programming language. It begins with the introduction to data types. In this, an overview of various types of data structures is given and asymptotic notations, best case, worst case and average case time complexity is discussed. The book then focuses on the linear data structures such as arrays, stacks, queues and linked lists. In these units each concept is followed by its implementation and logic explanation part. The book then covers the non-linear data structures such as trees and graphs. These data structures are very well explained with the help of illustrative diagrams, examples and implementations. The text book then covers two important topics - hashing and file structures. While explaining the hashing - various hashing methods, and collision handling techniques are explained with necessary illustrations and examples. File structures are demonstrated by implementing sequential, index sequential and random file organization. Finally searching and sorting algorithms, their implementation and time complexities are discussed. The sorting and searching methods are illustrated systematically with the help of examples. The explanation in this book is in a very simple language along with clear and concise form which will help the students to have clear-cut understanding of the subject.

Advanced Java is a textbook specially designed for undergraduate and post graduate students of Computer Science. It focuses on developing the applications both at basic and moderate level. This text book is divided into seven units. The first unit introduces Java network programming. In this unit along with the basic concepts of networking, the programming using Sockets, InetAddress, URL and URLConnection class is discussed in a lucid manner. The second unit is based on JDBC programming. In this unit, connecting with the database is discussed with examples and illustrations. Then next two chapters focuses on server side programming by means of Servlet programming and JSP. In third unit, the illustration of how to create and execute servlets is given. Then the concept of cookies and session management is discussed. In the next subsequent unit the Java Server Pages - its overview and programming is studied. In the last three units the advanced concepts of Java programming such as JSF, Hibernate and Java Web Framework : Spring is discussed. The contents of this textbook is supported with numerous illustrations, examples, program codes, and screenshots. With its lucid presentation and inclusion of numerous examples the book will be very useful for the readers.
