Architects have long been inspired by nature. Evidence of its influence can be seen throughout the ages, from the natural symbolism of Ancient Greek and Roman architecture to the works of 20th ...

9 Architectural Wonders Inspired by Nature

If natural gas is used at a site, for every 20 Joules consumed, 1 Joule may be needed to extract and distribute the gas to the site. Metrics for net zero source energy buildings account for these factors, though exact metrics can vary depending on site and utility factors.

Net Zero Energy Buildings - Whole Building Design Guide

Architect Santiago Calatrava wanted to incorporate both the urban and natural features of Lake Michigan, which the building overlooks, and took into account the "culture" of the lake front ...

BBC - Earth - Nine incredible buildings inspired by nature

When seismic waves reach the Earth's surface, they cause the ground, and anything sitting on it, to vibrate at certain frequencies. During an earthquake, a building will tend to vibrate around one particular frequency known as its natural, or fundamental, frequency.

How Earthquake-resistant Buildings Work - HowStuffWorks

In fact, Allen's group has even coined a new term for this work: buildingomics. The idea is derived from genomics—in the same way that a person is more than individual genes, a building is ...

5 Surprising Ways Buildings Can Improve Our Health

Buffalo was "a natural", utilizing the Parkside Candy Shoppe, All-High Stadium, the Ellicott Square Building and War Memorial Stadium. Filming on "The Natural" began on August 1, 1983, but weeks before shooting started, Barry Levinson and key members of his crew were scouting locations.

Forgotten Buffalo featuring Locations of the Natural

A "green" building is a building that, in its design, construction or operation, reduces or eliminates negative impacts, and can create positive impacts, on our climate and natural environment. Green buildings preserve precious natural resources and improve our quality of life.
