In this third book in his real estate photography series, Nathan takes you step by step through the challenges to shoot and edit professional, exterior photos. With easy to understand terms, instructions and discussions, coupled with over 100 images and screenshots, this book progresses through basic- to expert-level techniques on how to master exterior composition, lighting, exposure blending, color compensation, camera settings, gear choices, distortion issues, and more. Learn how to capture and quickly edit stunning twilight photos; create impressive indoor-outdoor images; and shoot large properties using an alternative to drone photography that doesn't require FAA certification. Along with Lightroom presets included in this book -- made specifically for exterior photography -- you'll learn rapid workflow procedures that turn regular photos into impactful images. See how you can create curb-appealing pictures that pop, placing you in the ranks of high-end photography.

Photographing interiors is not as easy as you might think, and it takes a lot of practice to produce consistently strong, high-impact compositions for your clients. Still, there is money to be made in this field, and whether you're looking to work as a full-time real estate photographer or develop a side-line business, you'll need to arm yourself to produce client-pleasing photographs. In this book, Ron Castle introduces you to the skills you need to succeed in real estate photography. You'll gain insight into some basics of the business, and you'll learn what kind of equipment you'll need to do the job. You'll also learn what and what NOT to photograph, work to produce strong compositions, and find suggestions for an efficient and effective post-processing workflow. The later chapters will consist of several sample home shoots. These images and their captions will provide helpful suggestions and perspectives on what a typical "real-world" real estate shoot entails.

In this second book in his real estate photography series, Nathan shows advanced editing techniques to create high-end real estate images. In-depth, detailed instructions, coupled with over 150 screenshots and example images guide you step-by-step through the tools used to repair images, validate exposures, correct problematic colors and artifacts, and easily remove unwanted items. Learn how to quickly add sunny skies to cloudy days, impactful TV scenery, and natural fireplace swaps. See how simple it is to evenly light a room by putting together photo composites in post-processing, along with tricks to make showers pop and hardwood floors look rich. Nathan places an emphasis on efficiency, sharing various Lightroom presets and showing how to turn repetitive Photoshop processes into one-button actions. While staying on-topic, Nathan also expands the "whys" to the "hows", providing a wide range of knowledge that can be applied to other techniques as well. Set yourself apart from the competition by learning the keys to editing speed with impressive, professional results.

With virtual tours on the rise in 2020, Nathan Cool's latest book is a timely resource showing how you can photograph, create, and host 360 virtual tours, in more ways than one. Using either inexpensive portable cameras or high-end DSLRs, Nathan shows the steps involved with 360 photography and how to optimize various techniques to fit your real estate photography business. Nathan covers gear, compositions, photography techniques, hosting services and options, editing practices, workflows, software, and pricing calculations to guide you through photographing and publishing 360 virtual tours. This book builds on techniques in Nathan's interior real estate photography book so that you can optionally incorporate flash and high-end editing

Essential for professional commercial photographers but with appeal for anyone who enjoys architectural photography, this book explains how to build better light indoors while finding the optimal positions for capturing images. Beginning with advice on understanding angles, controlling perspective, and becoming familiar with the tools necessary for capturing interiors, this guidebook then progresses onto explanations of various types of light, methods for manipulating them, and circumstances under which different lights should be utilized. Also included throughout the book are example shots of homes, businesses, and public spaces followed from start to finish, illustrating the challenges of the shoot, how these problems were solved, and any work that required editing after the shoot.

The core goal of photography is representing subjects that have depth and texture in a medium that inherently lacks both those qualities, and this book shows the best way to rise to that challenge: through the careful application and capture of lighting. It demonstrates how to accentuate or minimize textures, add or subtract highlights, and create or combat shadows to showcase the subjects in the best way and create the illusion of a third dimension in the images. Exploring techniques for lighting portraits, still-life subjects, nature images, and architectural shots, both studio and location lighting are covered in detail. The book teaches photographers how to study their subjects—with all of the textures, colors, shapes, and surfaces they have—then visualize the image as a finished photograph before the photography actually begins. With chapters that thoroughly cover the science of lighting and visualization, photographers can apply that knowledge and successfully create artful images.
