180,000 years have passed The Ark has returned with others from outside our galaxy. All the members of the conspiracy to save the Progeny and Furies are making bets on what they will find. Did the Progeny and Furies on the planets they seeded find the Box? If so, what did they do with it? Have any of them gone into space? Did any of them meet? If they did, what happened? What they do find are three things: surprises, galactic war, and eventually a journal entitled "Stories from the Tree". The journal does not answer all their questions, but for each of the seeded planets, including Research 4, there is a story recounting the events surrounding the finding of the Box. Reading through the papers he found in the barn, the author was surprised to discover how significant the finding of the Box was on some planets and how insignificant it was on others. In all cases, however, drama surrounded the finding of the Box. Each story, in addition, gave those on the Ark a snapshot of the culture that had arisen on each of the planets during their absence.
