Highly regarded for its clinically relevant and thought-provoking content, Winingham's Critical Thinking Cases in Nursing, 6th Edition features 150 case studies that cover all four clinical practice areas: medical-surgical, pediatric, OB/maternity, and psychiatric nursing. Each case covers a common patient problem, drawn from actual clinical experiences and written by nurses who are clinical experts. This edition reflects the most current standards of clinical practice, including content on pharmacology, nutrition, and diagnostic/laboratory tests to prepare you for all aspects of patient care. From nursing educators Marann Harding and Julie Snyder, this workbook helps you develop your clinical nursing judgment and bridge the gap from nursing knowledge to nursing practice. Comprehensive case study approach uses cases drawn from actual clinical experiences to help you identify changes, anticipate possible complications, and initiate therapeutic interventions. Progressive case complexity builds on previous learning and helps you develop more and more expertise. 150 case studies cover all major clinical areas, including medical-surgical, pediatric, OB/maternity, and psychiatric cases, providing you with many diverse clinical situations and opportunities to apply knowledge and develop critical thinking skills. Body system organization makes the book easier to use with medical-surgical nursing textbooks and courses. NEW! QSEN icons highlight essential safety content. NEW! Increased emphasis on NCLEX® Exam-style alternate-format questions includes multiple-response, prioritization, and illustration-based questions, offering better NCLEX Examination preparation. NEW! Additional documentation questions and a NEW Chart View design provide more experience in documenting patient care based on real-world electronic chart formats. NEW! Reorganized format presents cases in three parts: 1) medical-surgical cases, 2) pediatric, maternity, and women's health cases, and 3) psychiatric and alternative therapies cases. NEW! Increased difficulty level includes more questions about care of older adults and multi-system situations. UPDATED content includes the latest clinical treatment guidelines, issues, and practice standards.

"Features 150 case studies that cover all four clinical practice areas: medical-surgical, pediatric, OB/maternity, and psychiatric nursing. Each case covers a common patient problem, drawn from actual clinical experiences and written by nurses who are clinical experts. This edition reflects the most current standards of clinical practice, including content on pharmacology, nutrition, and diagnostic/laboratory tests to prepare you for all aspects of patient care."--Publisher

A collection of case studies for nursing students and practitioners offers 148 examples that foster creative thinking skills in medical-surgical, pediatric, maternity and psychiatric situations.

This is a Pageburst digital textbook; the product description may vary from the print textbook. Improve your critical thinking skills with 148 realistic case studies from all four clinical practice areas: medical-surgical, pediatrics, maternity, and psychiatric nursing. Each case in Critical Thinking Cases in Nursing, 4th Edition covers a common problem, drawn from actual clinical experiences and written by nurses who are clinical experts. All cases have been thoroughly updated and revised to include current clinical practices, with integrated content on pharmacology, nutrition, and diagnostic/lab tests to encourage you to think critically about all aspects of care. This fourth edition also features highlighted prioritization content to help you prepare for success on the NCLEX® examination and provide quality patient care. Uses a comprehensive case study approach drawn from actual clinical experiences, helping you learn to think critically, prioritize, and deliver proactive nursing care. Each case study reinforces a critical thinking approach to patient care by helping you identify changes, anticipate possible complications, and initiate therapeutic interventions. Questions for each case study are rated according to their level of complexity - knowledge, comprehension, application, analysis, and synthesis. Cases increase in complexity throughout each chapter so that you can steadily increase your knowledge. Includes separate chapters on important topics such as alternative therapies, multiple system disorders, and emergency situations. Logical, body system organization of medical-surgical cases makes it easier to use with numerous medical-surgical nursing textbooks and courses. Presents more clinical case studies than any other resource - 148 in all - covering all four clinical nursing settings. Groups cases so you can find relevant information easily. Medical-Surgical, Pediatric, Maternity, and Psychiatric, and Other/Advanced Cases. Includes new cases on pediatric and maternity patients. Provides a new emphasis on prioritization in the clinical setting, highlighted with an easy-to-spot icon, to reinforce critical thinking in practice.

Perfect for: Bachelor of Nursing Students Diploma of Nursing students. Apply theory to practice with the Clinical Cases textbook series! Janine Bothe's Clinical Cases: Medical-Surgical Nursing Case Studies is part of the Clinical Cases textbook series, which offers nursing students a collection of scenarios that are common in a variety of practical settings. Some of the topics covered in Medical-Surgical Nursing Case Studies include: Cardiovascular, Gastrointestinal, Musculoskeletal and Respiratory in relation to medical-surgical nursing. The Medical-Surgical Nursing Case Studies textbook is complete with multiple choice questions throughout the chapters so you can revise and test your knowledge as you progress through the text. Best of all, use Bothe's nursing textbook alongside Lewis' Medical-Surgical Nursing, 3rd Edition by Diane Brown and Helen Edwards to really excel at your Diploma and Bachelor of Nursing courses. Benefit from the logical structure of this nursing textbook. Medical-Surgical Nursing Case Studies features a clear introduction that explores an existing condition and outlines its symptoms. Further details are then provided to help you form a more complete context, including: patient's conditions, tests, medications and other considerations. Each case study within this nursing textbook provides a thorough conclusion that examines patient outcomes and the case's key points. If you enjoy learning from real life cases, the Clinical Cases textbook series is the perfect educational suite to support your nursing education. Janine Bothe's Clinical Cases: Medical-Surgical Nursing Case Studies is perfect for use during exam preparation or as a study tool, providing an engaging approach to learning and revision. Browse other titles in this series to enhance your knowledge of core nursing skills and theories. Other titles in this series: Clinical Cases: Fundamentals of Nursing Case Studies by Natasha Scully and Damian Wilson Clinical Cases: Nursing Care Case Studies by Margaret Webb and Ellie Kirov Other Formats This book is also available as an App via the Apple App Store (<https://itunes.apple.com/au/app/clinical-cases-medical-surgical/id666477607?mt=8>) Easy-to-understand, logical layout. 22 case studies covering the body systems. Multiple choice questions to test your knowledge throughout the textbook. Rationales provided for all answers. References for further reading and research. Designed as an exam preparation and revision tool.

Detailed and up-to-date, this new second edition offers practical case studies covering a wide variety of critical care problems. Each features questions and answers to help readers sharpen their critical-thinking skills and prepare for the CCRN exam. It features new chapters on blunt abdominal trauma and abdominal aortic aneurysm, and updated case studies reflect new treatment modalities and current critical care pharmacology.

Uncovers the art and science of nursing grounded in caring for all nursing situations Grounded in the belief that caring is the central domain of nursing, this innovative book presents a new approach to "nursing situations." These are case studies depicting shared lived experiences between the nurse and patient that are studied from various theoretical perspectives. They are designed to foster a nursing student's ability to care effectively for a patient, family, or group. Each case study features a compelling scenario that engages the reader to feel and fully participate in the caring experience. The book presents a variety of situations that new and experienced nurses are likely to encounter, many of which present scenarios that require caring for a patient under difficult or complex circumstances. The book addresses the need, as defined by leading health care and nursing education organizations, for the study of nursing from a contextual, story-oriented perspective. It is based on the Barry, Gordon & King Teaching/Learning Nursing Framework, developed as a guide to uncover the art and science of nursing grounded in caring in all nursing situations. Following a description of the framework's foundational concepts, the text describes how to use nursing situations to facilitate learning. The scenarios offer detailed, practical strategies for analyzing nursing situations in ways that bring to life the simple and complex practice of nursing grounded in caring. These real-life stories also help students understand the impact of health conditions on individuals and families, thereby fostering empathy. Case studies address nursing situations across a variety of populations, health concerns, and practice settings. Using multiple ways of knowing and understanding, each scenario concludes with direct and reflective questions that help students develop nursing knowledge and skills. The book serves as a core resource for nurse educators and students at all levels seeking to study the art and science of nursing grounded in caring. Additionally, the book is a resource for in-service educators in health care systems that specifically address caring as an essential value for practice. KEY FEATURES: Delivers a new approach to nursing education focusing on the context of caring between nurse and patient Presents a collection of real-life nursing scenarios designed to foster caring knowledge and skills under all circumstances Offers detailed, practical strategies for analyzing nursing situations to aid in learning the practice of nursing grounded in caring Helps students to understand the impact of health conditions on individuals and families

Tap into 150 unique case studies covering all four clinical practice areas: medical-surgical, pediatric, OB/maternity, and psychiatric nursing, all newly organized to facilitate a conceptual approach to teaching and learning. Each case covers a common patient problem, drawn from actual clinical experiences and written by nurses who are clinical experts. Cases include integrated content on pharmacology, nutrition, and diagnostic/laboratory tests to encourage you to think critically about all aspects of patient care. The 7th edition features a new concept-based organization, an enhanced focus on interprofessional collaboration and QSEN, 20 all-new case studies, and updated content throughout to reflect the most current standards of clinical practice.

This psychiatric-mental health undergraduate textbook, based on the theories of Hildegard Peplau and Joyce Travelbee, is the first recent book devoted to interpersonal relations as the foundation for therapeutic practice in psychiatric nursing. It guides the student through the essential phases of self-discovery necessary to integrate interpersonal nursing theory into practice, and provides a historical overview of the profession. The book addresses the most current ISPN and APNA competencies and presents content designed to foster self-growth, and critical thinking and decision-making skills, as well as to implement therapeutic interventions. It offers an overview of theories of mental illness and a detailed discussion of commonly seen psychiatric disorders, and addresses mental health care settings across the lifespan and different populations. Clinical case studies and first-hand accounts vividly describe the realities of living with specific mental illnesses, "What would you do?" questions stimulate discussions, and sample and practice care plans for chronic mental illness facilitate integration of concepts into practice. Evidence-based practice summaries from psychiatric nursing and related research literature are included, and NANDA guidelines are integrated throughout. A new chapter with DSM-V updates is also available. This affordably priced text additionally comes with supplementary materials for both teachers and students, including handy review guides, summaries, drug monographs, and hyperlinks to films and video illustrating content. A test bank and PowerPoint slides are also available for instructors. Key Features: Integrates and applies the Peplau/Travelbee interpersonal relations theories to the four-step Assessment, Planning/Diagnosing, Implementation, and Evaluation (APIE) nursing process Addresses critical thinking, clinical decision making, therapeutic interventions, case management roles, and mental health care settings across the lifespan Features NCLEX preparation questions, vivid clinical scenarios, and evidence-based practice summaries Addresses the most current ISPN and APNA competencies A new chapter with DSM-V updates is available Both student and teacher digital aids, including review guides, summaries, hyperlinks to films and video, and drug monographs are available A test bank and PowerPoint slides are also available for instructors eBook Features (available in all eBook formats): Bidirectional link between Key Terms and their glossary definitions Learning Outcomes at start of chapters link to respective sections in book Hyperlinks to supplementary films and videos Care plans DSM-V update This book is also available as part of a discounted set.
